

OSINTEL CHEATSHEET

Important

- All the tools are stored in **/opt** directory
- For using all tools just type the tool name on terminal and the tool will run automatically..
- Don't change the settings of **firefox** because it will destroy the Privacy container..
- There is a tool called **Removelog** it will help you to remove logs of your system (to run this tool just type the name "removelog "and enter it will remove all the logs)

- Nimbus
- Exif Viewer
- User-agent Switcher and Manager
- Image search options
- Resurrect Pages
- Copy Selected Links
- OneTab
- KeePassXC Browser

"Open source intelligence is a double-edged sword; it can be used to build bridges or to dig trenches, to foster collaboration or to sow discord. The key lies in the hands of those who wield it, and the choices they make."

OSINTEL
